A message from Free Revolutionaries of Tehran for the first anniversary of revolutionary uprising 2022

To freedom-seeking people, forward-looking and progressive Parties and organizations around the world:

The murder of Zhina (Mahsa) Amini by Iran's morality police (so-called Gasht-e Ershad) sparked the revolutionary uprising against the whole apparatus of Islamic Republic. An uprising so huge that gained the whole worlds' solidarity; opening it's way in different dimensions and aspects of revolutionary activities for months. The continuity of this movement in Iran is a sign of so many years of accumulating anger under decades of suffocating suppression and exploitation getting worse and worse. This disastrous situation was pushed on our society by Islamic regime since it's very first days of empowerment. This fascist movement got it's hands on power with associating and compromising of some reactionary political parties along with the approval of tyrannical western governments 44 years ago.

Holding unofficial and unfair courts and trials led to executions and physical eliminations of the opposition. Forcing mandatory Hijab and sexual inequalities in any aspect possible and systematic sexism, disarming the revolutionary forces, mass censorship in media and press, and shutting off the assemblies and soviets in working and educational spaces, countryside and villages among with the revolutionary neighborhood committees was some of the first organized and counter revolutionary actions IR is guilty of. As the Mourning Parents of killed protestors say: "We neither forget nor forgive."

We still remember the semi-governmental Sepah Pasdaran's armed troops' invasion of Torkman Sahra (north east of Iran) on 26th of March 1979 ; how could we forget the attack to Kurdistan's selfmade assemblies and soviets by the government's military forces on 19th of August 1979. We certainly will not forgive the brutality and cruelty of Islamic committees during 80s; savagely forcing Islam on educational system and the bloodshed in suppression of protestors on 30th of June 1971; none is forgiven. Thousands of underaged soldiers died during 8 years of Iraq and Iran unnecessary war for the benefit of the government when the war could be stopped sooner. A massive number of opposition activists and fighters got sentenced to death penalty beck then under the shadow of war. Then the chained murders which occurred in 90s was organized and lunched by the very intelligent service of IR and led into murder of numbers of intellectual, educated, open minded ones among political figures and activists. The list of this totaliter and fundamentalist regime's brutality is never ending.

The bloody suppression of university dormitory protests on 9th of July 1991 and many arrests afterwards also suppressing and the harshest torturing of university leftist "liberty and equality seeking" students also known as "DOB" on 4th of December in 2007 comes on the long list of criminal acts of IR. Many other brutal actions took place to hold back angry working classes' strikes and many other layers of society voices asking for justice were silenced by horror and terror.

Killing and torturing protestors in 2009 with the disastrous criminal actions in Kahrizak prison in the same year. Many other cruelty and injustice went on later in the uprising in December 2017, July and August 2018, November 2019, on 16th of July 2020, July 2021 and the ongoing mega uprising in 2022 made the ones in charge and responsables' case heavier and made the revolutionary anger grown massively. The day of justice is not so far, when trials will be held and the truth will be

clarified. We are prosecutors and in the middle of this unjust fight for our rights.

The military and intelligence forces of IR kill opposed protestors and claim that they have committed suicide or got killed by terrorist rioters or had a heart attack! To put a lead on their lies they kidnap the families of the killed fighters and force them for false confessions in front of national TV cameras.

In this country not only they have had organized and lunched serial poison gas attacks to children in their schools, but also they have actually shot and killed children with bullets and teargas direct shot in the face. Protestors get blinded or die by pellet bullets and gun fires; they also get raped and sexually harassed in custody.

The government forces literally steal dead bodies of protestors! They attack the funeral and other memorial ceremonies with teargases to scatter mourners. They even break the grave stones of our martyrs.

The anti-riot forces shoot directly into the houses of the suspected protestors and attack their houses in big numbers. During the protests and arrests has happened many times that internet services and even electricity of engaged neighborhoods got switched off. The IR government has been using underage children as anti-riot forces. This fascist regime has committed mass murder facing unarmed protestors of Javanrood, Piranshahr, Bukan, Mahabad and more with war weaponry. Doesn't these manslaughters make any humans' blood boil?

Many of workers, teachers, journalists, university students, athletes, environmental activists and families of killed protestors were captured, arrested and many protestors were sentenced to death, some already executed.

The large-scale destruction of natural habitats and environmental damages and air and water fatal pollution alongside with systematic racism specially against Afghanistany refugees and discrimination against religions other than Sheea Muslims and many other rightlessness has become unbearable.

The reactionary and tyrant governments can not prevent our victory no matter how hard they try to possess it. The victory of our revolution will be encouraging more revolutions all around the globe. Help us by lifting up our voices for everyone to hear! Help the revolutionaries in the heart of the battlefield; because today we are in an important phase of our history. We are fighting for freedom, social-welfare of all living creatures and saving our nature and environment with no exceptions. For us the goal of moving towards global freedom can not be reached unless we pass the first step; overthrow the Islamic regime in Iran.

Rise towards solidarity beyond borders for a world without dominance and exploitation.
